

DESIGN & DEVELOPMENT PROFESSIONALS

Over several decades of being Australia's trusted provider of hydraulic systems and components, **HYDPOWER's** expertise and knowledge has been in high demand to assist clients with specialized hydraulic consulting services

We came to realise that although clients often employ engineers, many of them lacked the skill and experience when it came to getting the most out of their Hydraulic Systems - limiting their equipment performance.

Thus began **HYDPOWER** Consulting, now a highly sought after hydraulic advocacy in Australia.

HYDPOWER'S engineers have accumulated thousands of hours building a very special and comprehensive hydraulic systems, components, application and support skillset. Having designed, installed and commissioned everything from small mobile hydraulic systems, to custom built sophisticated production machinery incorporating hundreds of individual components & thousands of connections, **HYDPOWER** has done it all.

There's no better company in Australia to trust with your hydraulic build and design needs.

Need only the best expert hydraulic system and components in Australia, then partner with **HYDPOWER** today!

Here are several ways in which **HYDPOWER** can help with our Consultancy Services:

- ★ Capable of meeting highly custom or bespoke hydraulic systems engineering
- ★ Comprehensive hydraulic component product lines - eco friendly designs & function
- ★ Optimization programs to maximize your hydraulic system efficiency
- ★ Strategic provision of upgrading and enhancing performance of systems and components
- ★ Knowledge sharing through in - house or online course training to educate and equip your staff with best practices, know how, servicing procedures and protocols

SYSTEM DESIGN

For over 40 years, **HYDPOWER** has accumulated a wealth of practical knowledge in designing, installing, optimizing and re-hauling hydraulic systems in multiple industry sectors. Our vast knowledge matrix allows us to employ cross application know-how to significantly improve efficiency, power conservation, Eco-friendliness, durability and longevity of all hydraulic systems we design and commission, for clients in all sectors.

Our advanced hydraulic system designs and tools deliver maximum performance and functionality with maximum efficiency and minimal power input. Every system we produce is based upon an Eco friendly design to reduce emissions by minimising losses caused through inefficiencies – while maximising performance, long service life and reliability.

Many years of system design experience also means that the creation of custom components, like a custom manifold for example, have become our area of expertise. Our consultancy services now routinely include development of custom components made exclusively for your hydraulic system projects, to help you get the most out of your unique application setup.

Talk to **HYDPOWER** Consultancy about your next hydraulics project. Experience possibilities you never thought were feasible before.

DEVELOPMENT

HYDPOWER'S development side of consultancy focuses on optimizing and improving your existing hydraulic systems to keep your equipment out performing your competitors.

By development, we mean helping you to evolve your current systems into more efficient, better performing applications that will outperform your competitors.

This is primarily achieved through our "**HYDPOWER** Challenge" program. Through our unique program, you have an opportunity to discover and learn how your existing applications can be significantly improved and optimized.

The **HYDPOWER** Challenge Program is FREE to clients that qualify, without risk or without obligation.

Hundreds of our clients who have taken us up on our **HYDPOWER** Challenge Program have become lifelong clients, due to the scope of development we first identified and then delivered.

Here are several ways in which our **HYDPOWER** Challenge Program can help you discover areas of improvement with your applications.

HIGHLY ACCOUNTABLE SUPPORT

At **HYDPOWER**, our support services are an automatic extension of our sales. We sincerely believe that our relationship with you is not only during sales, it extends for the life of our system and we take responsibility of providing ongoing support for as long as it is required.

- ★ Support by 24 Month
- no risk warranty for all products
- ★ 'Right First Time' - every time
- ★ Assured delivery of all components
- ★ Timely and genuine support to help you recover from repairs, issues or downtime
